

2MM LIGHTWEIGHT WETSUIT

Experience lightweight mobility, flexibility, and reliable performance with our 2.0mm Superstretch Neoprene Wetsuit.

Built for warm-water conditions and high-energy watersports, it combines premium materials with a clean, streamlined design.

Internal neoprene backing panel helps minimise water flushing for improved warmth and comfort during extended use. The ultra-stretch neoprene delivers outstanding range of motion, while precision construction ensures a secure, comfortable fit from start to finish.

Durable, corrosion-resistant, and easy to operate rear entry YKK zip, providing reliable entry and exit even in demanding marine environments.
