

4-WINDOW MASK

Experience exceptional underwater visibility with the Four Window Dive Mask. Designed with a unique twin split lens configuration and four-window construction, this mask provides an expansive panoramic field of vision, allowing you to take in more of the underwater world with every dive.

The transparent surgical-grade silicone skirt offers a soft, comfortable seal and adapts to a wide variety of face shapes and sizes, helping to minimise leaks and maximise comfort during extended periods underwater.

Combining performance, comfort and style, the Four Window mask is available in an attractive black frame with striking red accents or full black only, making it the perfect addition to your diving equipment.

The Four Window mask delivers clear vision and dependable comfort dive after dive.
