

2 PIECE MILITARY BASE LAYER UNDERSUIT

The two-piece thermal base layer set is designed for optimal insulation and comfort in cold weather, featuring a breathable fabric that wicks away moisture to keep you dry.

The soft, stretchable material provides a snug fit while allowing full movement, making it ideal for both indoor and outdoor activities.

Ergonomic features like the integrated thumb holes and ankle cuffs help keep layers in place during intense movement.

FEATURES

Moisture-wicking, keeps sweat off the skin, reducing chills.

Breathable fabric, allows airflow to prevent overheating.

Thermal insulation, traps warmth close to the body for cold conditions.

Stretch and fit, offers freedom of movement with a close, flexible fit.

Lightweight, feels comfortable and non-bulky under outer layers.

Quick-drying, ideal for repeated use in wet or humid conditions.

Reinforced seams, ensures durability during intense activities.

Ergonomic design, includes thumb holes or ankle cuffs to secure positioning.

Can be worn on its own or layered up with other undersuits
