# MILITARY CODA SPLIT FINS

Based on the same principle as nature uses to propel the mighty creatures of the ocean forward, the efficiency of the design ensures that increased power is delivered through the fins with less effort required from the diver.

The unique patented design allows water flow to interact with each fin blade producing independent thrust from each fin. The fins also produce thrust on each up and down stroke, improving a diver's finning efficiency whilst diving.

The polymer was developed to ensure a stronger fin action in currents and the elastomar has a soft feel, with good spring and retains its unique shape, even in Arctic waters.

Size chart for use with drysuit boots :-

Fin - M : UK 4-UK 6 Boot

Fin - L : UK 7-UK 10 Boot

Fin - XL : UK 11+ Boot

- Patented dual split-fin design
- Unique 'natures wing' shaped dive fins
- Superb power and performance
- Ultra heavy duty build quality
- Very efficient finning on both up and down strokes
- Best value diving fin in this class
- As provided to UK MoD
- NSN: 4220 – 99 – 325 – 1902
