

# INNER GLOVES - FOR DRY GLOVE RING SYSTEM

Keep your hands warmer on every cold-water dive with the Northern Diver Thermal Inner Gloves. Designed for use with the Northern Diver Dry Glove Ring System, these lightweight fleece liners provide an extra layer of insulation without compromising comfort or dexterity.

Manufactured from soft, four-way stretch thermal fleece, they trap warm air while allowing moisture to escape, helping keep your hands warm and comfortable throughout extended dives. Flat-lock stitched seams reduce bulk, while the snug-fitting wrist ensures a secure fit beneath dry gloves.

Suitable for recreational, technical, military and commercial divers, these versatile liners can also be worn for walking, hiking, camping, fishing and other outdoor activities.

**SIZE:** S, M, L, XL

## FEATURES

Designed for use with Northern Diver Dry Glove Ring Systems
