

STROBE LED TORCH

Our LED Strobe Torch has a single 1W LED with 120 lumens output (30% higher than our previous model). The upgraded strobe unit is now silent-operating and has been further developed to surpass the performance of our previous model in colder water temperatures.

During operation, the strobe unit is visible up to 2 miles away (depending on conditions) and has a continuous burn time of up to 6 hours. Manufactured from impact resistant ABS material, the one piece body features our newly developed (three position) external magnetic function. The unit is now depth tested to 50 metres.

FEATURES

- Powerful single 1W LED with 160 lumens output
- Approx. 30% brighter than the previous model
- Upgraded silent-operating strobe unit
- Improved cold water performance and reliability
- Strobe visible up to 2 miles (3.2km) away (conditions dependent)
- Three-position external magnetic function switch
- Tough one-piece impact resistant ABS body
- Twin attachment points for secure mounting
- Supplied with wrist lanyard
- Compact, lightweight and durable design
- Suitable for diving, maring safety and emergency signalling applications

SPECIFICATIONS

- Torch burn time: Up to 6 hours
- Strobe burn time: Up to 12 hours
- Depth tested: 50 metres (164')
- Weight: 0.188kg (0.4lbs)
- Requires 3 x AA batteries which are not included
