

POWER FINS

These high-performance twin blade diving fins are engineered to deliver an optimal balance of power, efficiency, and control. The advanced split-blade design incorporates a flexible central section, allowing each blade to move independently through the water. This reduces resistance on both the upstroke and downstroke, resulting in a smoother, more efficient kick cycle.

By improving water flow and minimising drag, the fins generate strong, consistent thrust while requiring less effort from the diver. This helps to reduce leg fatigue, making them ideal for extended dives and repeated use in demanding conditions.

The design also enhances manoeuvrability, providing precise control whether finning in open water or navigating tighter spaces. An ergonomic foot pocket ensures a comfortable and secure fit when worn with diving boots, supporting stability without compromising comfort.

For ease of use, the fins are fitted with adjustable quick-release straps, allowing for rapid donning and removal—even when wearing gloves. The secure strap system ensures a reliable fit across a range of boot sizes.

KEY FEATURES

- Twin blade with flexible mid-section
- Efficient propulsion with reduced effort from the user
- High manoeuvrability and control
- Comfortable, ergonomic foot pocket
- Adjustable quick-release fin straps

COLOURS

Blue, Silver, Yellow

SIZES

- S/M (4–6)
- M/L (7–9)
- L/XL (9–11)
- XXL (11+)

DESCRIPTION

DIVING FINN

STOCK CODE

FIN-2081-'SIZE'-'COLOUR'
