

60L RED YKK® ZIPPED DRY BAG

The Northern Diver YKK® Red Zipped Dry Bag is a large-capacity, watertight and airtight storage bag designed to protect essential equipment in demanding diving, commercial and rescue environments.

Manufactured from tough 500 denier PVC, the bag features reinforced welded seams and a high-compression YKK® Aquaseal® dry zip, protected by PU tape, helping keep water and air securely contained. With a generous 60L capacity, it provides ample room for dive equipment, clothing, rescue equipment and other essential kit.

Despite its size and rugged construction, the bag weighs just 0.85kg (1.9lbs), making it practical to transport. Adjustable padded shoulder straps provide greater comfort when carrying a full load, while the reinforced lift strap between the shoulder straps has been load tested to 100kg (220.5lbs).

For specialist applications, the bag can also be fitted with inflation and exhaust valves, making it adaptable to a range of professional requirements.

The YKK® Zipped Dry Bag is also available with custom branding, allowing organisations to add their logo in either reflective or non-reflective print.

Dimensions - 39*62*24cm
(15.4*24.4*9.4")
Weight - 0.85kg (1.87lbs)
