

THIGH EQUIPMENT POCKET FOR WEIGHT & TRIM HARNESS

Made from the same durable fabric of our Weight and Trim harness, you can purchase the thigh pocket as a spare or replacement for the original that comes with the harness.

These sturdy thigh pockets slot easily into the buckle on the pocket's housing. Offering plenty of space for your small bits of equipment, the thigh pocket closes securely using a hook and loop fastening.

If you are using it to give you extra weight in the water then the lead weights are a perfect fit for this pocket.

Adjustable three-pronged squeeze clip and buckle for comfort and security around the thigh of the wearer, for additional support and weight distribution.

The 316 marine grade stainless steel eyelet feature on the front of the thigh pocket acts as an ideal drain hole.

Compatible with both the V1 and V2 Weight and Trim Harness Designs.
