LOCKING CUFF DUMP VALVE

Achieve effortless buoyancy control with the Locking Cuff Dump Valve—a compact, maintenance-free solution that automatically vents excess air when the arm is raised. Discreetly fitted into the drysuit cuff, it provides smooth, reliable air release while reducing the complexity and bulk of traditional exhaust valve systems.

A simple 45° locking mechanism allows the valve to be quickly opened or closed as required, while the mushroom silicone seal provides dependable watertight performance. CE approved and extensively cycle tested, the valve is built for long-lasting reliability without the need for servicing or adjustment.

Suitable for recreational, technical, commercial and rescue diving, the Locking Cuff Dump Valve offers dependable performance in a lightweight, streamlined design. OEM branding is available for bulk orders.

SIZE: 60 × 60 × 30 mm (2.4 × 2.4 × 1.2")

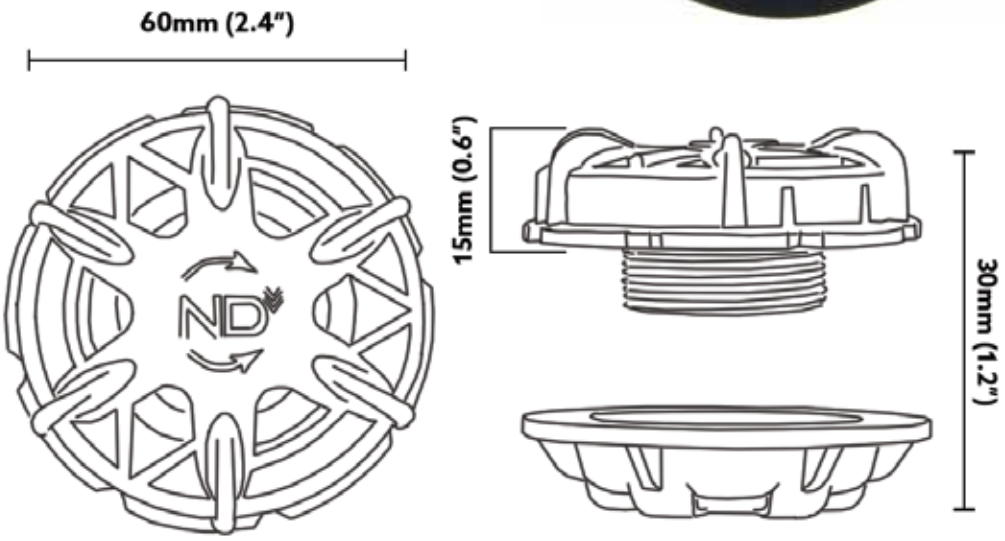

WEIGHT: 0.031 kg (0.07 lbs)

FEATURES

Secure locking mechanism with quick 45° open/close operation
Automatic venting when arm is raised for controlled buoyancy
Maintenance-free design with no adjustments required
Mushroom silicone seal for reliable, water-tight performance
Compact cuff-mounted design for streamlined integration
CE-approved and rigorously cycle-tested for durability
Suitable for recreational, technical, and professional diving
OEM branding available for bulk orders
