With Separate  
**3M™ Adhesive Tape**

**Flexi-light sticks** have a high intensity LED which projects light through a flexible silicone stick. It has a simple press to operate button under the coloured marker, which activates flashing, constant and off modes.

The **Flexi-Light stick** can be twisted or bent during storage or in use with no damage occurring. Unlike chemical light sticks, the user decides when to turn the **Flexi-Light stick** on or off. Replacing chemical light sticks with reusable **Flexi-Light sticks** can add up to a significant cost saving at the end of the year.

**Flexi-Light sticks** are offered in five colours and Infrared. The colour coded marker at the end allows the user to quickly identify the light color.

High intensity light sticks burn brighter and faster than traditional glow sticks. These **Flexi-Light sticks** are up to three times brighter than standard glow sticks and are waterproof and depth tested to 60m, they are non-sparking and non-heat producing.

### 3M™ 300LSE Adhesive Transfer Tape

Provides excellent bond to plastics and low surface energy coatings such as, polypropylene and powder coated paints, combined with high shear for excellent temperature resistance. A strip of 3M™ Adhesive Tape can be supplied with every **Flexi-Light stick** for simple and easily application onto a range of surfaces and equipment.

Visit our website or call our sales team for current prices.

### Specially Designed Removable Flexi-Light Stick Pocket

This pocket is designed to perfectly fit all Northern Diver **Flexi-Light sticks**. The light stick can be quickly slid into place and viewed through the transparent window. Inside the pocket is lined with SOLAS reflective tape which has a non-slip surface to help the light stick stay in place.

Originally designed for Northern Divers **HID** tri-laminate drysuit the pocket easily clips into place using the plastic fix-loc buckles and is secured via the hook fastener on the reverse. This handy removable pocket can be fitted to any drysuit or piece of equipment.

**Pocket available separate**

# flexi-light Pocket With Hook & Loop Fastener

**This Flexi-Light stick pocket is supplied with most new Northern Diver BCDs but would make a great addition to any dive kit.**

This pocket is designed to perfectly fit all Northern Diver **Flexi-Light sticks** and works in the same way as the Removable Flexi-Light pocket on the HID drysuit.

The pocket easily attaches to any webbing, hoop or lash tab, simply loop the strap and push together to bond the hook and loop fastener in place.
