

60L ZIPPED DAYSACK DRY BAG WITH MOLLE SYSTEM

A large watertight, airtight and lightweight bag with integrated MOLLE system. The YKK® Zipped Daysack Dry Bag with MOLLE System is manufactured from black 420D nylon TPU CN and has welded seams for extra reinforcement. The YKK® high compression Aquaseal® dry zip is protected with PU tape.

The bag has adjustable, padded shoulder straps and is load tested to 100kg. Fitted with two compression straps, 50mm plastic d-rings, reinforced corners and an inflation/deflation tube which can be locked to prevent accidental deflation. This dry bag has been designed with MOLLE system panels welded to the front and sides, making it easy for users to effortlessly attach any MOLLE compatible bag or equipment to it.

Custom branding is available, we can print your logo onto this bag in reflective or full colour, artwork services offered by our inhouse creative dept.

Weight: approx 0.85kg
Width: 37cm, height: 69cm, depth: 23cm
and volume: 60L

Also shown : Utility Dry Bag
The 25mm webbing straps, with press stud closure, on the back of the utility dry bag are specially designed for effortless attachment to any MOLLE compatible dry bag.

*MOLLE (Modular Lightweight Load-carrying Equipment).
