

# METALUX TEMPERATE 100G THERMAL UNDERSUIT

Metalux® is one of the most lightweight, high-performance insulating materials available.

It is designed to reflect thermal radiation and reduce air movement, even when wet or compressed.

It retains its thermal integrity throughout the life of the garment, which is hard-wearing and machine washable.

This model is most commonly used for UK summer diving conditions and/or with drysuits that have thermal properties.

You'll also get a convenient black drawstring carry bag that's complete with logo and mesh panelling.

Flexible panels in the lower back, shoulders, cuffs and feet give exceptional freedom of movement, without sacrificing warmth.

- Lightweight
- Fleece-lined
- Quick-drying design
- Bacteria and fungus resistant
- Zipped chest pocket
- Pockets on hips
- Elastic foot stirrups
- Two way YKK® zip
- Drawstring mesh bag supplied
