

MILITARY TITANIUM HRC50 KNIFE

Our Northern Diver HRC50 Knife is classed as a "combat diver knife". The blade is made from high quality 50HRC beta titanium alloy, so it's an ideal dive knife for recreational scuba divers and professionals. With a full shank drop pointed tip blade, the knife is great for cutting, digging and prying. It also has a line cutter further down the blade which provides purchase enabling you to keep the line in place while the blade administers a swifter, cleaner cut. The top edge is serrated so the knife can easily be used for sawing. The blade is housed in a strong plastic casing with an ergonomically moulded sure hand curved grip for easy handling. This is to ensure maximum grip even when wearing thick neoprene dive gloves. With all these features, we think you'll struggle to find a better large dive knife.

All metal components are Titanium Alloy including the knife blade. The knife is non-rusting, non-magnetic and gets its HRC50 name because of its place on the Hardness Rockwell C-Scale.

Our Military Titanium HRC50 Knife comes in a super strong, self-draining nylon sheath with a squeeze and release locking mechanism, one of the most effective available today. While the Neoprene leg harness is user adjustable, offering comfort and automatic compensation for wetsuit compression it also has quick disconnect buckles.

- 100% NO RUST
- Non-magnetic
- Drop point blade
- Serrated top edge for sawing
- Line cutter
- Sure hand grip
- Blade Length: 125mm (4.9 inch)
- Overall Length: 260mm (10.25 inch)
