

DIVEMASTER SPORT DRYSUIT

Northern Diver's Divemaster Sport Drysuit is flexible but also hard-wearing. It is the first choice of active sport divers and the UK's major commercial diving schools.

Manufactured from a specially formulated 5mm hyper-compressed neoprene, the Divemaster Sport Drysuit allows freedom of movement and real diving flexibility. Hyper-compressed is not just a name to increase product appeal, this is a full commercial process requiring the use of a 500 ton heated press. Although this may sound excessive, this is a necessary process to achieve the highest possible standards in neoprene manufacturing.

The versatility of our Divemaster Sport Drysuit used in conjunction with any of our range of undersuits. (For example, Thermalux in mild European waters or Metalux Temperate for more extreme diving conditions). The Divemaster Sport Drysuit provides a comfortable environment during recreational diving, ice diving and long duration cold water diving.

Durability is increased by the heavy-duty pique nylon outer shell. Thermal properties are also improved using our unique Ti-Ax® Thermacote® heat-reflecting system under the inner lining. Even in the most testing diving conditions, with a whole host of premium features as standard, this drysuit really is a leader in reliability.

- 100% CR Hyper-Compressed Neoprene
- Neoprene neck and wrist seals
- Kevlar® Protective Shoulder Panles
- Printed Kneepads
- BDM Metal Dry Zip with Protective Cover
