Unzips to become a handy changing mat

The Arctic Survivor is our new tri-laminate drysuit, designed to deliver great value and all-round performance. The drysuit has a nylon outer and features integrated oversized knee and seat protection and our acclaimed rugged hard sole boots. Securing the drysuit is a YKK® Aquaseal® zip, protected by a zip flap with hook and loop fastening tabs. The Arctic Survivor can be worn in conjunction with numerous thermal garments or combinations of thermal garments.

Our high performance inflation and exhaust valves, a zipped transporter pocket and a hook and loop fastening bellows pocket are fitted as standard. Pockets, valves and their positions can be customised on request, along with a host of other drysuit elements. The suit is supplied with a bag, hood, hose and maintenance kit.

**Features:**

- Tri-laminate fabric construction
- Integrated oversized knee and seat protection
- Rear entry YKK® Aquaseal® zip
