

WOMENS MARLIN OPEN WATER TRIATHLON WETSUIT

We have been designing and producing world-class wetsuits for over 45 years and are proud to present our latest innovation, the Marlin Triathlon suit.

Our ladies' suit has been intricately designed and cut to work perfectly in conjunction with the female body, ensuring unparalleled freedom of movement, comfort, and ultimately...performance. To achieve this, the perfect fit must be attained, that's why our ladies Triathlon Suit, when worn, will feel like a second skin - tight without being restrictive and perfectly smooth around your body.

We created two versions of the suit as it was vital to consider the differences between the male and female body frame and shape, a one-size-fits-all approach would not suffice for the serious triathlete and open water swimmer.

FEATURES

- Constructed from Yamamoto #30, #40 SCS and Aerodome neoprene
- Wetsuit panels range from 2.0mm to 5.0mm (see construction photo)
- Triple glued & taped seams
- Glide through the water more efficiently and with zero drag
- Reduces body heat loss with the metallic alloy barrier
- Cuffs/ankles designed to be trimmable
- YKK® zip with long zip puller & Velcro to secure
- Protective inner zip flap
- Open water visibility with bright purple shoulder/arm panels
- Quick easy on.
- Easy off - which eases frustration
- Smooth overprint pattern on panels
- Mesh storage bag included
