

Nitro 9'4" Kids Inflatable Stand up Paddleboard

The Nitro powered by Northern Diver is the perfect way to get kids onto the water on their own board. This highly durable board is made to the same rigorous standards as the rest of our range, but it's dimensions make it easier for young riders to manoeuvre on rivers or in the surf.

The Nitro is perfect for the next generation of paddler and is an ideal entry point into the world of SUP. Kids will love learning how to paddle on their own with this great board and it's inflatable so when you're done adventuring for the day, simply deflate, and pack it up in the included bag. So what are you waiting for? Get your kids ready for a summer of fun on the water with the iSUP Nitro!
