

# SUP

## Coiled Safety Leash

A SUP leash is essential for the security of your equipment and your safety. Using a SUP leash ensures that your board will stay close to you even if you fall or get knocked off your paddle board. Having a SUP leash will allow you to get back onto your board quickly.

Made from coiled polyurethane floating line, the comfortable ankle strap has a hook-and-loop closure. With two in-line swivels to prevent tangling and a quick-release belt that enables the ankle tether to be converted to a calf strap as required. The leash has an easy pull tab and has been designed with a handy hidden key pocket.

### FEATURES

- Leash is 0.7m (2'3) long while coiled and can expand to 3.0m (9'8)
- Ankle/calf strap 44\*6cm (17.3\*2.4")
- Hidden key pocket 8\*4cm (3.1\*1.6")
- Sits comfortably around your ankle or calf while you're paddling
- Strong urethane cord
- 316 stainless steel swivels
- Attaches to any D-Ring on your SUP
- Made of very hard-wearing and resistant material

### MAXIMUM COMFORT

- Ultra-comfortable padded neoprene ankle cuff
- Coiled design keeps the leash out your way until you need it the most
- No drag on water, kelp, or weeds

### STRONG & LIGHT

- Strong enough to handle the longest and heaviest of boards
- Lightweight and flexible

### SAFETY FIRST

This coiled leash is equipped with a two-direction swivelling ring, stainless steel, resistant to corrosion and rust, essential to prevent belt from twisting and can protect your feet from being tangled. An adjustable neoprene strap fastens your leg with the board in a comfortable way both for men and women.
