

# SINGLE BLADE T-BAR PADDLE

Our classic single blade T-bar paddle is all you need to get started with your water sport activities. Suitable for all Northern Diver inflatables, this lightweight and collapsible paddle is easy to assemble and perfect for beginners getting started with activities like paddle boarding. The simple push-button connector makes assembling quick and simple, while still providing a strong and sturdy hold when pushing against tough waters. The comfortable T-bar grip handle also makes the use of the paddle ideal for all waters, allowing you to make powerful strokes and quick turns, while still maintaining excellent control. The paddle is designed to glide through the water effortlessly and smoothly, with the blade being straight and centred, making it easy to push against water from any orientation.

The paddle in full length is 163cm, with the ability to detach into two smaller pieces (85cm), making it easy to store and transport in a space efficient and convenient manner. The push-button lock allows you to build and collapse your paddle in a matter of seconds, needing to simply press the button in, and slide the paddle into position. This paddle is easy to use, pack down, travel and store, making it the perfect timeless piece for a water sport user of any level.
